

## Techniclean™ HP

High pressure spray process cleaner

### Description

Castrol Techniclean™ HP is an aqueous, low alkalinity, industrial cleaner containing biodegradable surfactants and corrosion inhibitors.

### Application

Techniclean HP is an inter-operational, multi-metal cleaner, suitable for cleaning parts and components in a wide range of industrial spray and intensive flood wash machines.

Techniclean HP is specifically developed for use in high-pressure process cleaning and deburring equipment.

Techniclean HP effectively removes soluble oils, light duty neat cutting or forming oils, lubrication oils, soft film corrosion preventives, swarf and general dirt.

### Conditions of Use

Concentration Range:	1 - 4%
Temperature Range:	ambient - 65 °C
Spray Pressure:	up to 1000 bar

Optimum conditions of use are depending on the detailed application requirements and the amount and nature of the soil being removed.

### Advantages

- Effectively minimises excessive foam – reliable, reduces costly risk of dangerous cavitations/damage of high-pressure pumps
- Excellent demulsifying properties provide easy skimming and long bath life – reduces maintenance and disposal cost
- Leaves a temporary corrosion preventive film on the metal surface – minimises scrap rate which improves productivity
- Versatile; multi-metal compatibility and suitable in hard and soft water – enables possible product consolidation

### Typical Characteristics

Description	Test Method	Units	Value
Appearance of Concentrate	Visual	-	Clear, light yellow liquid
Density @ 20 °C	ASTM D4052	g/ml	1.04
pH (2% in DI water)	ASTM E70/97	-	9.3

Subject to usual manufacturing tolerances.

## Concentration Control

### TITRATION:

1. Pipette 10 ml in an Erlenmeyer flask
2. Add 1 - 2 drops of indicator solution nitrazine yellow
3. Titrate with hydrochloric acid ( $c = 0,1 \text{ ml/l}$ ) until colour changes from blue to yellow
4. Concentration = required ml hydrochloric acid \* **factor 1,0**

## Storage

To avoid product deterioration always keep the container/drum tightly sealed. Store the product in a cool, dry place away from direct sunlight. Prevent exposure to frost and avoid water ingress. For optimum product stability, it is preferable to store the product indoors between 5°C and 45 °C / 41°F and 113°F.

For more details, please refer the product safety data sheet.
